

**RIETER**

**Rieter at a Glance**

## RIETER GROUP

Rieter is the world's leading supplier of systems for manufacturing yarn from staple fibers in spinning mills. Based in Winterthur (Switzerland), the company develops and manufactures machinery, systems and components used to convert natural and man-made fibers and their blends into yarns in the most cost-efficient manner. Cutting-edge spinning technology from Rieter contributes to sustainability in the textile value chain by minimizing the use of resources. Rieter has 18 production locations in ten countries and employs a global workforce of around 5 100, about 16 percent of whom are based in Switzerland.

Rieter is a strong brand with a long tradition. For more than 225 years, Rieter's innovative momentum has been a powerful driving force for progress in the spinning mill industry. The main focus is the efficiency of the customer's yarn production, that means spinning efficiently with a minimum use of resources. Therefore, Rieter makes an important contribution to the sustainable production of textiles.

With a global sales and service organization, Rieter is well positioned as market leader in the global competitive environment.

For the benefit of shareholders, customers and employees, Rieter aspires to achieve sustained growth in enterprise value. With this in mind, Rieter seeks to maintain continuous growth in sales and profitability throughout the investment cycle in the textile industry.

The company comprises three business groups: Machines & Systems, Components and After Sales.

## ESTABLISHED PREMIUM SUPPLIER WITH INNOVATIVE PRODUCTS AND SERVICES

The Business Group Machines & Systems develops, produces and distributes new equipment as spinning systems or as single machines. Blowroom and cards are used for fiber preparation; draw frames, combers and roving frames are used for spinning preparation; and ring, compact-, rotor and air-jet spinning machines as well as winding machines are used for end spinning. The offer is supplemented by planning services and automation solutions as well as ESSENTIAL, the digital platform for the complete spinning mill.

The Business Group Components develops, produces and distributes technology components and precision winding machines as well as solutions for the production of filament yarns and nonwoven fabrics. Technology components come into contact with fibers and affect yarn properties; they are used in new machines and have to be replaced at regular intervals during operation.

The Business Group After Sales develops, produces and distributes spare parts for Rieter machines as well as building conversions and modernizations. After Sales also sells technology components that are not included in the range of products offered by the Business Group Components. After Sales also offers services that enable Rieter customers to improve the efficiency and effectiveness of their spinning mills.

## MISSION, VISION, VALUES AND PRINCIPLES

Rieter is guided by common values and principles that provide a framework for its practices, actions and decisions. Together with the mission that explains the fundamentals of Rieter's business, and the vision that outlines what the company is striving for, these values and principles form the basis of Rieter's corporate culture:

- Customer first
- Technology leadership
- Quality starts with me
- Me and us
- Right things right
- People with passion

Rieter has a long history to look back on. A company that has been successful in the market for more than 225 years must have done many things right. Rieter's values and principles play a vital role in further developing the company and ensuring its ongoing success. Everyone at Rieter respects these values and principles – after all: **Rieter makes the difference!**
