

UNIfloc – Take-off unit drive new with round toothed belt
UNIfloc A 1/2, A 10

RIETER

Round Toothed Belt

Up to 50% longer service life and improved power transmission

Your benefits:

- Longer service life
- Improved power transmission
- Reduced wear
- Higher efficiency

Round Toothed Belt

Up to 50% longer service life and improved power transmission

Longer service life

Service life is increased by up to 50% with the improved toothed belt. This result has been achieved by using special materials in combination with reinforcements.

Improved power transmission

Power transmission is considerably improved with 25% more teeth and the new, rounded tooth shape. At the same time, abrasion and wear are significantly reduced.

Installation time

The upgrade can be performed by a qualified mill mechanic. However, it is recommended to have this work done by a Rieter specialist. The installation takes approx. 4 – 5 hours, provided the machine is in its original condition.

Necessary ordering details

To ensure rapid and reliable order processing, the following ordering details are required:

Machine type/year

Machine and serial No.

Current drive belt

New drive belt
