EASYdoff

Universal cutting
and catching crown

EASYdoff

Economical solution with no compromise on quality

Catching and cutting crown EASYdoff is a new solution based on traditional design. Its application range is universal. There are no limits with respect to speed, count, machine type or Novibra spindle model. It is suitable for rings diameter 34mm and above.

OUTSTANDING ADVANTAGES

Universal

All material and count within the short staple scope
Can be combined with any Novibra spindle model

Flexible

Can be supplied with new machines or as an upgrade to existing ones
No adjustment to the machine or its setting needed

Reliable

Thanks to unique raster of the yarn catching area

Reduced maintenance

Due to reliable catching and cutting of the yarn at doffing

Easily exchangeable

Crown can be replaced easily by Novibra tool
