Rieter's Online Operator Training

A smarter way to train  
spinning mill operators

# ROOT: Digital and Offline Training Solution

Equips spinning mill operators and technicians with practical, standardized knowledge – anytime, anywhere

**Rieter's Online Operator Training (ROOT) is certified digital training program designed to support spinning mills worldwide in building confident operator teams and achieving operational excellence. Available both online and offline, ROOT delivers practical, application-oriented knowledge of Rieter machines – enabling faster onboarding, fewer operational errors, and consistently high operator performance across the entire spinning process.**

## Why ROOT

ROOT equips operators and technicians with practical, application-focused expertise on Rieter machines – available anytime and anywhere:

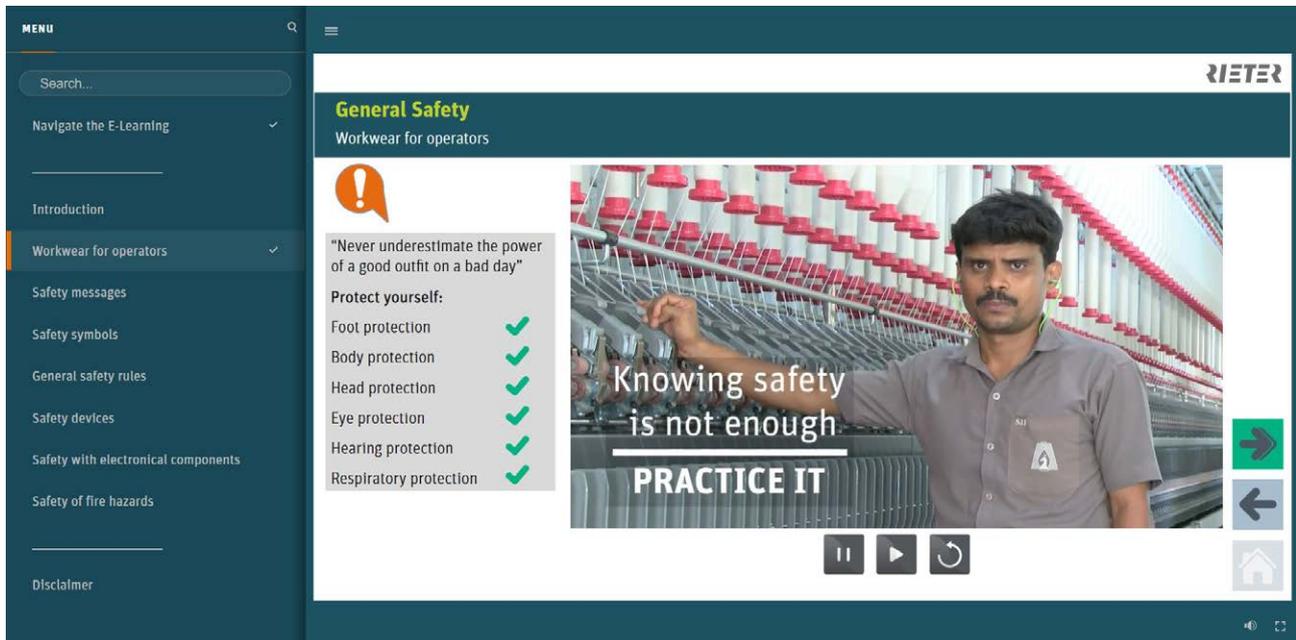

- Certified training for consistently high learning quality
- Standardized training across all sites, shifts and teams
- Reduced onboarding time
- Lower training costs
- Higher operational consistency

## What ROOT covers

ROOT provides complete digital training coverage across the spinning process: from blowroom to winding machine.

The training program supports the entire machine lifecycle and can be used before commissioning, during ramp-up or as refresher training during ongoing production.

User interface of ROOT – user-friendly and self-explanatory

## Languages and accessibility

- All modules are available in English
- Key modules (general safety, ring spinning and winding) are also available in:
  - Arabic
  - Chinese
  - Hindi
  - Spanish
  - Tamil
  - Turkish

ROOT is a globally accessible training solution, available both online and offline, ensuring operators can complete their training regardless of network connectivity.

### How ROOT creates impact:

- Faster operator readiness
- Increased operational consistency
- Reduced errors and downtime
- Safer machine operation

ROOT is more than an e-learning tool. It is a scalable, future-ready training solution that reflects Rieter's commitment to innovation, quality, and customer success – enabling spinning mills to build top-performing teams and achieve reliable performance in an increasingly competitive market.
